Midnight Holocausts Raze  
Law School and Lexington  
Planing Mill Establishment

### Outside Aid Summoned

Cadets Ordered to Scam to  
Aid Firemen in Work and  
Protect Institute Property

December 16.—Lexington this morning witnessed one of its most destructive and distressing set of fires. It was a case of bad luck coming in pairs. Two fires, either of which would have been a disaster in itself, broke out within a short while of each other and left complete destruction in their wakes. The properties destroyed represented a money value of \$95,000 of which about \$40,000 was covered by insurance. The Law Building of Washington and Lee University, in which was contained an extremely valuable law library, and the planing mill and lumber yard of Higgins and Irvine were the properties burnt.

### Lumber Yard First

The lumber yard was the first of the properties to catch and an alarm was turned in on this fire at 1:50 a. m. The fire company of Lexington arrived on the scene at about 2:15. Difficulty was experienced at first due to lack of hose and to the inconvenient location of fire hydrants. The fire fighters were also handicapped as their pumper broke down, a connecting rod having burned out. To assist them to bring the fire under control the hose of the Washington and Lee University was borrowed and turned to good account.

### Prevent Spread

Most of the energy of the firemen was turned to the prevention of the spread of the fire to adjoining properties which it repeatedly threatened to do. A large number of sparks were thrown into the air by the fire and these constituted a grave menace to nearby homes. The fire also generated an intense heat which was so great as to set power line poles across the street on fire and which also caused the paint on fronts of houses facing the fire to burn. Great help was rendered the firemen in checking the spread of the fire by householders who wet down their property with garden hose. Several narrow escapes were occasioned when those who were working from their roofs, had difficulty due to the late snow which still remained in some places (Continued on page twelve)

## Southern Conference Opens Doors To New Members; Still Bans Broadcasts

Group May Expand to Include William and Mary, Richmond,  
Four Other Colleges; Must Wait Until Next Year;  
Delegates Vote 5-3 to Keep Radio Out

December 15.—The Southern Conference held open house today and gave an opportunity for six colleges within the geographical confines of the Conference to become members, thus increasing the membership from ten to sixteen. However, no school will be admitted before the next annual meeting of the Conference, and then only by invitation of the committee.

It is thought that the six colleges will be Richmond, William & Mary, Wake forest, Davidson, Citadel and Furman. Coach Wade, of Duke,

said that Georgetown, George Washington, and Catholic University might like to join because they had to play by Southern Conference rules when they played members of the Conference and if so they should be given the opportunity of joining.

An extra session of the Committee may be held at the time of the Southern Conference Boxing Tournament at Charlottesville February 28, in which case the schools admitted can take part in the Conference. (Continued on page twelve)

## Monthly Drill Held Tuesday

Company Works Comprise  
Garnett Andrews Competition  
For Present Month

December 11.—The date for the Competitive Drill for the month of December has been set by the Commandant of Cadets for Tuesday, December 18, or as soon thereafter as possible.

During this drill all movements will be executed by the Company, with the execution of the individual and squad movements being the important factors in the rating of the companies.

All of the commissioned officers will be prepared to command the company. In case a platoon leader is designated to drill the company the next in rank in the platoon is to command the platoon.

### Important Factors in Contest

The Garnett Andrews Cup is awarded to the company exhibiting the highest efficiency as an organization during the year and this year the following system of rating companies will be in effect: Precision and accuracy at drill—55; Guard duty—40; Discipline—40; First and Second lines (at ceremonies)—30; Intramural athletics (per sport)—10; Spring Hike efficiency—to be announced. This list shows the subjects which will be considered and each is followed by the possible number of points per month for the respective subjects.

### Improved Method

This change as to the method of company competition is a vast improvement over the method formerly employed, since it carries the competition into every field of company activity instead of only cov-

## New Buildings Ready Jan. 2nd

Mess Hall and Laundry to be  
Finished by Return of Corps  
After Christmas Furlough

December 15.—The new mess hall which has been under construction during the past few months, is now practically finished, and will be ready for occupation immediately after the Christmas furlough. It is not yet wholly finished, some of the minor parts being as yet incomplete, but all the major parts are finished and already there is some transfer of equipment from the temporary mess hall in the gymnasium.

### Equipment Moved

As soon as the corps leaves on Christmas furlough the real moving of equipment will begin. All the temporary arrangements will be removed and set up in the new mess hall and when the corps returns, they will find it ready for immediate occupation. The minor details that are at present incomplete, will be completed shortly after Christmas.

The new laundry, too, is practically finished but it is not as complete as the mess hall and it is not definite, as yet, when it will begin operations. It is hoped that this also will be ready for use on the return of the corps from furlough, but this is not certain. However, it will definitely open sometime in January.

### Institute Laundry

When the new laundry is put in operation, it will run under practical conditions. (Continued on page twelve)

## Publicity Department Has Accomplished Much Under Direction Of McCarthy

The newly-founded Publicity Department of the V. M. I. has already done yeoman duty and accomplished excellent results. Since November 11 through its efforts four hundred and fifty inches of newspaper stories have been printed. This is the equivalent of more than two full pages in a newspaper. To date most of the stories printed have been just routine coverings of such things as the honor roll, competitive drills, Founder's Day exercises, Corps trip to Richmond, etc.

### Capt. McCarthy Appointed

On November 10 the Superintendent appointed Captain Frank McCarthy General Assistant on Publicity. This new set-up is different from that of the regular publicity officer, Lieut-Col. Road, who has charge of the athletic end. Capt. McCarthy's Dept. concerns itself with the general news of the Institute.

Aside from the new stories that have been published a number of

pictures have appeared in eastern newspapers. The New York Times, Washington Post, and Roanoke Times are some of the leading newspapers which have run pictures showing Cadet and Institute views.

### Allotment Made

Until December 8 there were no funds with which to carry on this work but on this date the Executive Committee of the Alumni Association voted an allotment of one hundred dollars to cover the incidental expenditures of the organization, such as postage, photographs and the like.

When approached concerning publicity Captain McCarthy stated:

"The papers which we have contacted show great appreciation for any V. M. I. material which they can get and they publish it almost unconditionally. The only regret is that the setup at present does not permit us to contact all of the papers that might be interested in (Continued on page twelve)

## Board Grants New Course For Pre-Meds

Psychology to be Substituted  
For Metallurgy as Result  
of Major Carroll's Activity

December 10.—The Academic Board has officially approved a permit which will cause a change in the schedules of the cadets taking the pre-medical division of the Chemistry course. The permit, which substitutes a course in psychology for the present course in Metallurgy, was submitted by the heads of the Pre-Medical Chemistry and Psychology Departments after a careful survey of the changes necessary to equip graduates of the pre-med course for graduate work in medicine. The investigators discovered that work in Psychology was necessary for graduate students both at the University of Virginia and the University of Maryland.

### Votes Approval

In an informal interview today, General Lejeune stated that the Board had voted the approval of this permit unanimously. Although he did not predict a full medical course for the future, the General did mention that all cadets were originally instructed in Civil Engineering only, and that the other departments were created under circumstances similar to those of this latest change of the curriculum.

Major Carroll, who was active in formulating the permit, expressed great satisfaction at its approval, and stated that the new pre-medical course will be equal in every respect to the demands made by the graduate schools.

Shortly after the approval of the permit became known, Col. Bates, of the Psychology Department, made the following statement to a representative of the Cadet:

### V. M. I. Not Pioneer

"Beginning with the second term, a course in general psychology will be given to Second Classmen who are pursuing work leading to the study of medicine. In this the Virginia Military Institute is not a pioneer as the practice of including psychology in pre-medicine has for a long time been obtained in many colleges. A distinctive course has been planned for students who will go into medicine, although it will closely resemble the course in general psychology now given. Case studies will be substituted for (Continued on page twelve)

## Cadets To Lecture For Physics Classes

December 14.—The Physics department has recently announced a program on Modern Physics in which at least eight cadets will take part in talks to be given during the review after the Christmas furlough.

It is the plan of the department to turn two days of the review period over to talks by the cadets with four making talks each day. The talks are expected to consume about forty minutes of the hour with the remainder of the time being devoted to a general discussion of the topics in question.

### Constitution of Matter

One of the purposes of the talks is to endeavor to give the class a better conception of the constitution of matter and it will include such subjects as atomic structure and radio activity.

Two introductory talks will be given: one on "Michael Faraday," and the other on the "Inventions and Discoveries of Joseph Henry."

### Innovation

Although this method will be somewhat of an innovation as a means of review at the Institute, (Continued on page twelve)

## Fencers Invited To Enter College Meet

December 15.—The New York Athletic Club has extended an invitation to the Varsity fencing team to enter a three-man team in the Annual inter-collegiate Invitation Fells Meet to be held at the club's gymnasium Saturday, December 22, at 7:45 p. m., it has been announced by Captain Nils Granfelt, fencing coach.

### Three Men to Go

At the present it is believed that Freeman and Kelley will enter the competition while there is a possibility of either Kirks or Segarra making the third man of the team. Last year a similar invitation was extended and V. M. I. was represented by a team composed of Moody, Freeman and Kelley.

This match besides being an outstanding social event of the year, is one of the most important fencing meets in the eastern part of the United States with teams entered from Navy, West Point, City College of New York, Columbia, University of Pennsylvania and other schools which produce some of the best amateur fencers in the country.

## Noon Saturday Sees Break In Routine

Col. Magruder Wishes  
Corps A Merry Xmas

December 16.—Colonel John Magruder, Commandant of Cadets, today expressed to the corps his best wishes for a merry Christmas. In wishing that the holiday would be a happy one for every cadet, Colonel Magruder expressed the hope that it would bring necessary relaxation from military duties. The text of his message follows: "It is a genuine pleasure to be permitted to extend to the Corps of Cadets my sincere wishes for the merriest Christmas. I hope the vacation season will bring to each cadet great happiness, and justly deserved relaxation from arduous duties and routine. May 1935 see the Institute enriched by what should prove to be the best Corps she has ever had." John Magruder, Col. and Commandant.

## Gen. Lejeune Gives Corps Best Wishes

Superintendent Expresses His  
Hope for Prosperous Year

Dec. 12.—Today the superintendent through the medium of "The Cadet," sent a Christmas message to the corps and extended to them his sincerest wishes for a very enjoyable furlough and a prosperous New Year.

### Following is his message:

To all V. M. I. Cadets:— I am very grateful for the opportunity offered me by "The Cadet" to publish my Christmas greetings to you and your families.

I wish for you and for them a Merry Christmas and a Happy New Year.

My wish for a Happy New Year includes a successful year at VMI for each of you in academic work and in conduct, because I know that nothing could bring more joy into the hearts of your families than your success at V. M. I.

In conclusion, I ask all of you to join with me in wishing that 1935 will be one of the most prosperous and successful years in the history of V. M. I.

With every good wish for you and yours, I remain  
Your sincere friend,  
John A. Lejeune,  
Superintendent, V. M. I.

## Texas Cadet Of 'Before Furlough' Days Received Strangest Xmas Gift Of All

December 10.—It all happened back in the days when cadets were men and to get a furlough they had to uphold a certain scholastic standard. . . Perhaps it was a good system, perhaps not. . . There were always many disappointed cadets left in barracks when the day came. Some had counted on being able to go. It was one of the latter who, according to Miss Nellie Gibbs, received what was possibly the strangest Christmas present ever given.

The name of this particular cadet has been lost from memory. We do know, however, that he had not been home in three years, for he lived in Texas, which is a long journey even today. This particular Christmas he was counting on seeing all the folks at home. He had even bought a new uniform for the occasion, which was to be a grand one, indeed.

There was one subject, we don't know whether it was Math or Eng-

Annual Christmas Furlough  
Announced by Superintendent;  
Order Issued Today

### Classes Suspended At 12

Commandant to Release Corps  
Not Later Than 1 O'Clock;  
Usual Inspections Ordered

December 17.—Christmas furlough this year will be practically the same as that of last year according to the order issued by the Superintendent today. The corps will be dismissed sometime between 12 and 1 o'clock on Saturday, December 22, and will return by 11 o'clock on January 2, 1935.

### The order follows:

Headquarters,  
Virginia Military Institute,  
Lexington, Virginia.  
December 17, 1934.

### General Orders )

No. 11. )  
I. The Christmas furlough will begin on Saturday, December 22, 1934.

Academic duties will be suspended at 12:00 noon on that date. Quarters will be policed and inspected, and departures may be reported when cadets are released by the Commandant of Cadets, which will not be later than 1:00 P. M.

II. The Christmas furlough will expire at 11:00 P. M., Wednesday, January 2, 1935, the hour of expiration being fixed to conform to train schedules from the North and West, and not with the intention of permitting cadets to loiter around the town of Lexington. Cadets reporting on that date earlier than the hour prescribed, will be allowed to visit in Lexington, in uniform, after policing their quarters, until 10:00 P. M.

III. Citizens' clothing may be worn on leaving barracks and returning to barracks at expiration of furlough. The Commandant will issue necessary orders governing withdrawal from and return to trunkroom of citizens' clothing.

IV. Those cadets desiring to remain at the Institute during the period of the furlough will give notice in writing to the Superintendent not later than 2:00 P. M., Wednesday, December 19. Information will be given later regarding quarters and mess for cadets who remain.

V. Cadets under confinement will be permitted to go on Christmas furlough, the time of their confinement being extended eleven (11) (Continued on page twelve)

lish, which had been worrying him. Hard work had brought a failing grade up considerably, but there was still room for anxiety. And when the grades came out he saw that he had worked in vain. He had failed by one-tenth of a point.

Sorrowfully, he called his mother in Texas to tell her that he would not be home 'till late that year. Maybe he told the operator his tale of woe. Maybe the telephone company was in one of its softer moods and had absorbed a little of the Christmas spirit. . . There are any number of maybes to account for what happened.

He talked to his mother for some time. The chances are that when he finally did hang up it was because of the cost. After all, Texas is a long way from V. M. I. It was then that he received the queer present. When he asked the operator for the cost for his talk, "There will be no charge," she replied sweetly. . .

### Flames Gut W.&L.; First Class Assists

Midnight Holocaust Razes Wash. & Lee Law School

(Continued from page one) and made such work extremely precarious.

#### Near Tragedy

A note of near tragedy was introduced when a Mrs. Harris who was suffering from pneumonia was carried to her daughter's home nearby when her own residence was smoking because of the heat of the close fire. However, later in the day she was reported as having suffered no ill effects from her exposure.

As the fire was being brought under control one of the fighters noticed a blaze in the direction of the University. Upon investigation this proved to be in the Law Building. The fire here had evidently originated in the hallway of the building and it was blazing furiously at the time of discovery, entrance being impossible either at the front or the back. Very shortly the fire went up the steps in the rear of the building and blew out the windows on the landing, thereby creating a draft for itself.

#### Equipment Delayed

About a half hour elapsed between the reporting of the fire and the arrival of equipment since all hose and material had to be reassembled and brought to the University. At this time help was asked of the Staunton and Buena Vista Fire Departments, since no satisfactory progress could be made without a pump. These departments responded in double quick time, the Staunton outfit being on the scene with lines laid in exactly an hour after they had been notified, even after the delay entailed in removing wet weather chains from their engine.

The fire had gained such headway that again all attention had to be focused on the saving of the main building and the home of Dr. Howe which are located in immediate proximity to the Law Building.

#### Commandant Notified

Colonel Magruder was notified of the fire by General Lejeune and immediately he had the First Class report to the vicinity of the fire, fearful lest the officers' homes be ignited by some of the great volume of sparks thrown out by the fire and also with the hope that some assistance might be offered to the hard pressed fire fighters. This was no idle worry since the flames were spurring fully two hundred feet into the air and casting such a tremendous number of sparks into the air that there was danger to all neighboring buildings.

#### Not Extinguished

Fully a hundred of the cadets of the First Class reported for duty and were put to work in patrolling the threatened areas on the lookout for any sparks which might reach the ground or buildings and thereby become the starting point for other fires. These men were also held ready to move out the furnishings of any home which might catch. That of Dr. Howe was the most seriously threatened.

The fire itself was never extinguished completely but all nearby homes and buildings were held safe from its encroaches.

The fires did a disheartening amount of damage, both in monetary value and in the value that accrues to a building through its continued use in productive enterprise, but in effort applied to their building up and in sentiment attached.

#### \$30,000 Loss

The Planing Mill of Higgins and Irvine suffered a loss of \$30,000 of which about ten thousand dollars was covered by insurance. The plant also suffered the loss of many valuable supplies which had been but recently acquired. A large order of cabinet doors for V. M. I. had just been completed and were ready for delivery on Monday morning. The lot was a complete loss. Three cars of California Redwood had been received during the past week and this also was a loss. Large lots of cement, lime and tur-

pentine were rendered worthless by the flames.

Theories of incendiariism have been advanced concerning the origin of the fire since when the firemen arrived the blaze was apparently equally strong in three places, making the fire practically hopeless to control.

#### No Robbery Motive

A motive of robbery was dispelled when the office safe was found not to have been tampered with as was originally supposed. The records were safe and intact except for the covers which had been charred by the intense heat.

The Washington and Lee University suffered a monetary loss of \$35,000 in the blaze which consumed their Law Building. The building itself was valued at \$50,000 of which \$20,000 was covered by insurance. The Library was covered to the extent of \$10,000 and was valued at \$15,000. A large amount of this damage can never be replaced as books were present, as well as various paintings, which cannot be replaced.

A bust of John Randolph Tucker was also destroyed by the flames. An extremely valuable set of books which had been loaned to the library by Captain Letcher and which had considerable historic value were also lost.

#### Manuscript Lost

Not the least of the losses suffered was that of Professor Johnson's. The manuscript of a book upon which he has been working for the past five years and of which advance notices have appeared, since it was to go to the printers in the near future, was consumed. However, the files of Professor McDowell were saved. These files embodied the records of the Law School up to the present session and are of very great value. These files were the only things saved from the entire fire and this was only made possible by the fact that they were kept in a rear room to which the fire had not had time to penetrate due to the confining influence of the walls of the hall.

#### New Building

The Law Building was built in 1898 of native limestone and it is extremely doubtful if these walls, which yet remain standing, can be utilized for rebuilding since the heat of the fire will undoubtedly have burnt them to lime to some extent. This will render them worthless as building material and even dangerous if used since the lime would swell as it accumulated moisture from the air. It is expected that a building more in line with the architecture of the main building will be erected.

Plans are already under way for a new building as evidenced by the statement of Mr. Penick, Treasurer of the University, who says:

"We will have a new Law Building by September."

#### Origin Doubtful

The origin of this fire is also doubtful, if not suspicious. The building is heated by hot water from a central plant, thereby removing furnace risks. The power in the building had been shut off at midnight by the night watchman as he has been in the habit of doing regularly. The starting of the fire by a cigarette is also extremely doubtful since the floors throughout are of maple and unless there were an accumulation of trash where the cigarettes were thrown no ignition would occur. Also, the fact that the fire was discovered raging throughout the entire hall with equal intensity in all parts points to incendiariism.

#### Police Interviewed

The Chief of Police, when interviewed, admitted no definite or active leads but indicated that his men were on the alert for any happenings or facts which might throw light on the perpetrators of the fires. He also indicated that if any person were implicated in the nights happenings, it would go extremely hard with him.

This theory is all the more tenable since one was not set until the other was well under way with all available equipment concentrated at the Lumber Yard. It might also be pointed out here that these fires might very well be a continuation of a series of minor blazes which have occurred lately, although the

### So. Conference Still Bans Broadcasting

(Continued from page one) ference football race next fall.

#### Radio Ban Kept

The greatest wrangle of the day developed over the radio broadcasting. The ban was finally kept by a vote of 5 to 3. As South Carolina schools are banned by State Law from broadcasting games, South Carolina and Clemson did not take part in the voting.

The "honor system" eligibility rule of C. P. Nash of the University of Virginia went through. Now the school will be the sole judge as to the academic eligibility of its team members. If a student passes enough work to remain in school he will be eligible. The previous ruling was that a man had to pass four-fifths of his work.

#### Committee Against Increase

The Executive Committee did not approve the proposal to increase the membership of the Conference but Gus Tebell, of Virginia, spoke in favor of it and after a brief discussion all of the members of the Conference except Maryland voted for the increase.

#### Couper Re-elected

At the close of the meeting the Conference re-elected its officers by acclamation—Forest Fletcher, of Washington and Lee as President; A. W. Hobbs, North Carolina, vice-president, and Col. William Couper, of V. M. I., secretary and treasurer. C. P. Miles as past president remains a member of the executive committee along with the officers.

#### Zimmerman Best Center

It also came out at the meeting that Billy Laval, South Carolina coach, will not be back next year. As yet there has been no mention of a successor. Eighteen of Duke's twenty-two football letter men voted that Captain Jack Zimmerman, in spite of an injured hand, was the best center they played against all season.

### New Mess Hall and Laundry Complete by End of Furlough

(Continued from page one)

tically the same plan as the Rock-bridge Laundry now employed. Prices will be the same and the time for sending out and receiving laundry will be the same. However, only the laundry of the mess hall, the hospital, and the cadets will be done. It will do no family laundry of any sort. Whether extra laundry such as paletots and mess jackets, will be done is as yet a question but it is believed that they can be taken care of after the laundry has been in operation a short time.

### Christmas Furlough Will Begin at Noon Saturday

(Continued from page one) days, to cover the period of the furlough.

VI. Attention is invited to the fact that the Institute will not assume responsibility for articles left in rooms, and cadets are cautioned to place all articles in their trunks, which should be locked securely.

By Command of Major-General Lejeune.

G. A. Derbyshire, Executive Officer.

### Publicity Department Has Done Good Work This Year

(Continued from page one) V. M. I. news. The field seems to be almost limitless, but law prevents any state institution's expending money for publicity.

supposed fire bug had been apprehended prior to last night. During the past fortnight there have been fires in a vacant schoolhouse, in East Lexington, an attempt on the Fire House and a false alarm, all of which is thought traceable to the individual who has been arrested.

At six o'clock tonight the two fires had not as yet been completely extinguished. Blazes of definite size could still be seen playing about in the ruins. However, there is no fear of renewed blazes from these sources as water is being steadily played on them.

### Academic Board Approves Permit For Pre-Med Course

(Continued from page one) laboratory practice. The chapters on personality will be stressed and amplified. The study of the nervous mechanism will be omitted, it having been studied in connection with physiology.

In the practice of medicine, as in every other field of human endeavor, there is always present the human equation, the study of which has become increasingly popular in recent years. The doctor's work is primarily concerned with human relations, not only in the treatment of his patients, but in his contacts with the public. The quickened tempo of civilization has thrown extra burdens upon human beings and has enforced demands that some individuals cannot meet. The result is many people lose their adjustments to society and to their

### Second Classmen to Speak in Physics Laboratory

(Continued from page one) it is believed that it will prove highly beneficial to the cadets as a means of summarizing their term's work.

During the year Osborne, Maxey, and deButts have carried out Millikin's Oil Drop Experiment with an error of only about one per cent. Their result was 4.72 times ten to the minus ten power, while the actual value is 4.77 times ten to the minus ten power. This experiment will be the subject of talks by N. M. Osborne and J. N. Maxey.

### December Competitive Drill to be Held Tues. Dec. 18
